PROFESSIONAL EXPERIENCE

Synapse Energy Economics, Inc., Cambridge, MA. Research Associate, 1996 to present.
Consulting on issues within the electric industry with particular attention on public health and consumer education. Recent projects include the developing a clean air plan for Queens, NY and researching load response technologies.

Massachusetts Department of Public Utilities, Boston MA. Electric Power Division, 1993 to 1998. Responsible for consumer education about electric industry restructuring; analysis of utility demand-side management implementation plans, budgets, and monitoring and evaluation reports; attending conferences and workshops on integrated resource planning and energy efficiency in a competitive electric industry; participating in settlement negotiations; and attending working group meetings on market transformation and on environmental disclosure and tracking.

Tellus Institute, Boston, MA. Research Analyst, Energy Group, 1993.
Worked on a project for EPA Acid Rain Division analysing joint SO₂ and CO₂ emissions abatement plans; reviewing environmental impacts of transmission line routing; developing a computer model for estimating environmental damages from power plants in New York.

EDUCATION

Boston University, MA, 1993, Energy and Environmental Studies.

Denver University, Courses in environmental law and environmental science, 1991.

University of Oklahoma, BA, 1989, English, Magna Cum Laude.
